

**NAME:** Christian N. Bag-ao

**COURSE TITLE:** NSTP

Reflection: The community service in Kabacan Elementary School was so exciting and enjoyable. We had been given a task to be a volunteer to clean a school, particularly at Kabacan Elementary School. In my experience, being a volunteer can give you a strong sense of accomplishment. Knowing that you are creating a safer, cleaner environment in that particular area, we all know that it will be appreciated by the staff and students of the school. Also, in the community service, we support each other, having cooperation and teamwork that is also important. The community service also teaches us to be more responsible, disciplined, and time-managed by being on time (call time). Moreover, engaging in these activities will enhance our awareness of our environment and our realization of having a cleaner environment. Finally, community service is essential to our environment and for our future generation.
